

Environmental policy

Our environmental work should set an example for other businesses.

We will constantly improve our environmental efforts and be a precursor in circular economy.

- *We shall work to ensure that environmentally friendly raw materials, manufacturing methods and distribution methods are used both by us and by our suppliers.*
- *We shall work to increase reuse and recycling of waste, production waste and used products.*
- *We shall work for increased knowledge and awareness of the principles of circular economy and measures that affect the entire product life cycle.*
- *We shall meet binding requirements by complying with current environmental laws, government requirements and environmental requirements from customers.*
- *We shall protect the environment by preventing pollution.*
- *Our environmental management procedures must follow the principles of the standard ISO 14001 and meet the requirements for the product label Möbelfakta.*
- *We will use the environmental policy to remind customers, employees, suppliers, retailers and the public of our long-term environmental strategy.*
